Strategy and plan for data transformation using Azure Synapse

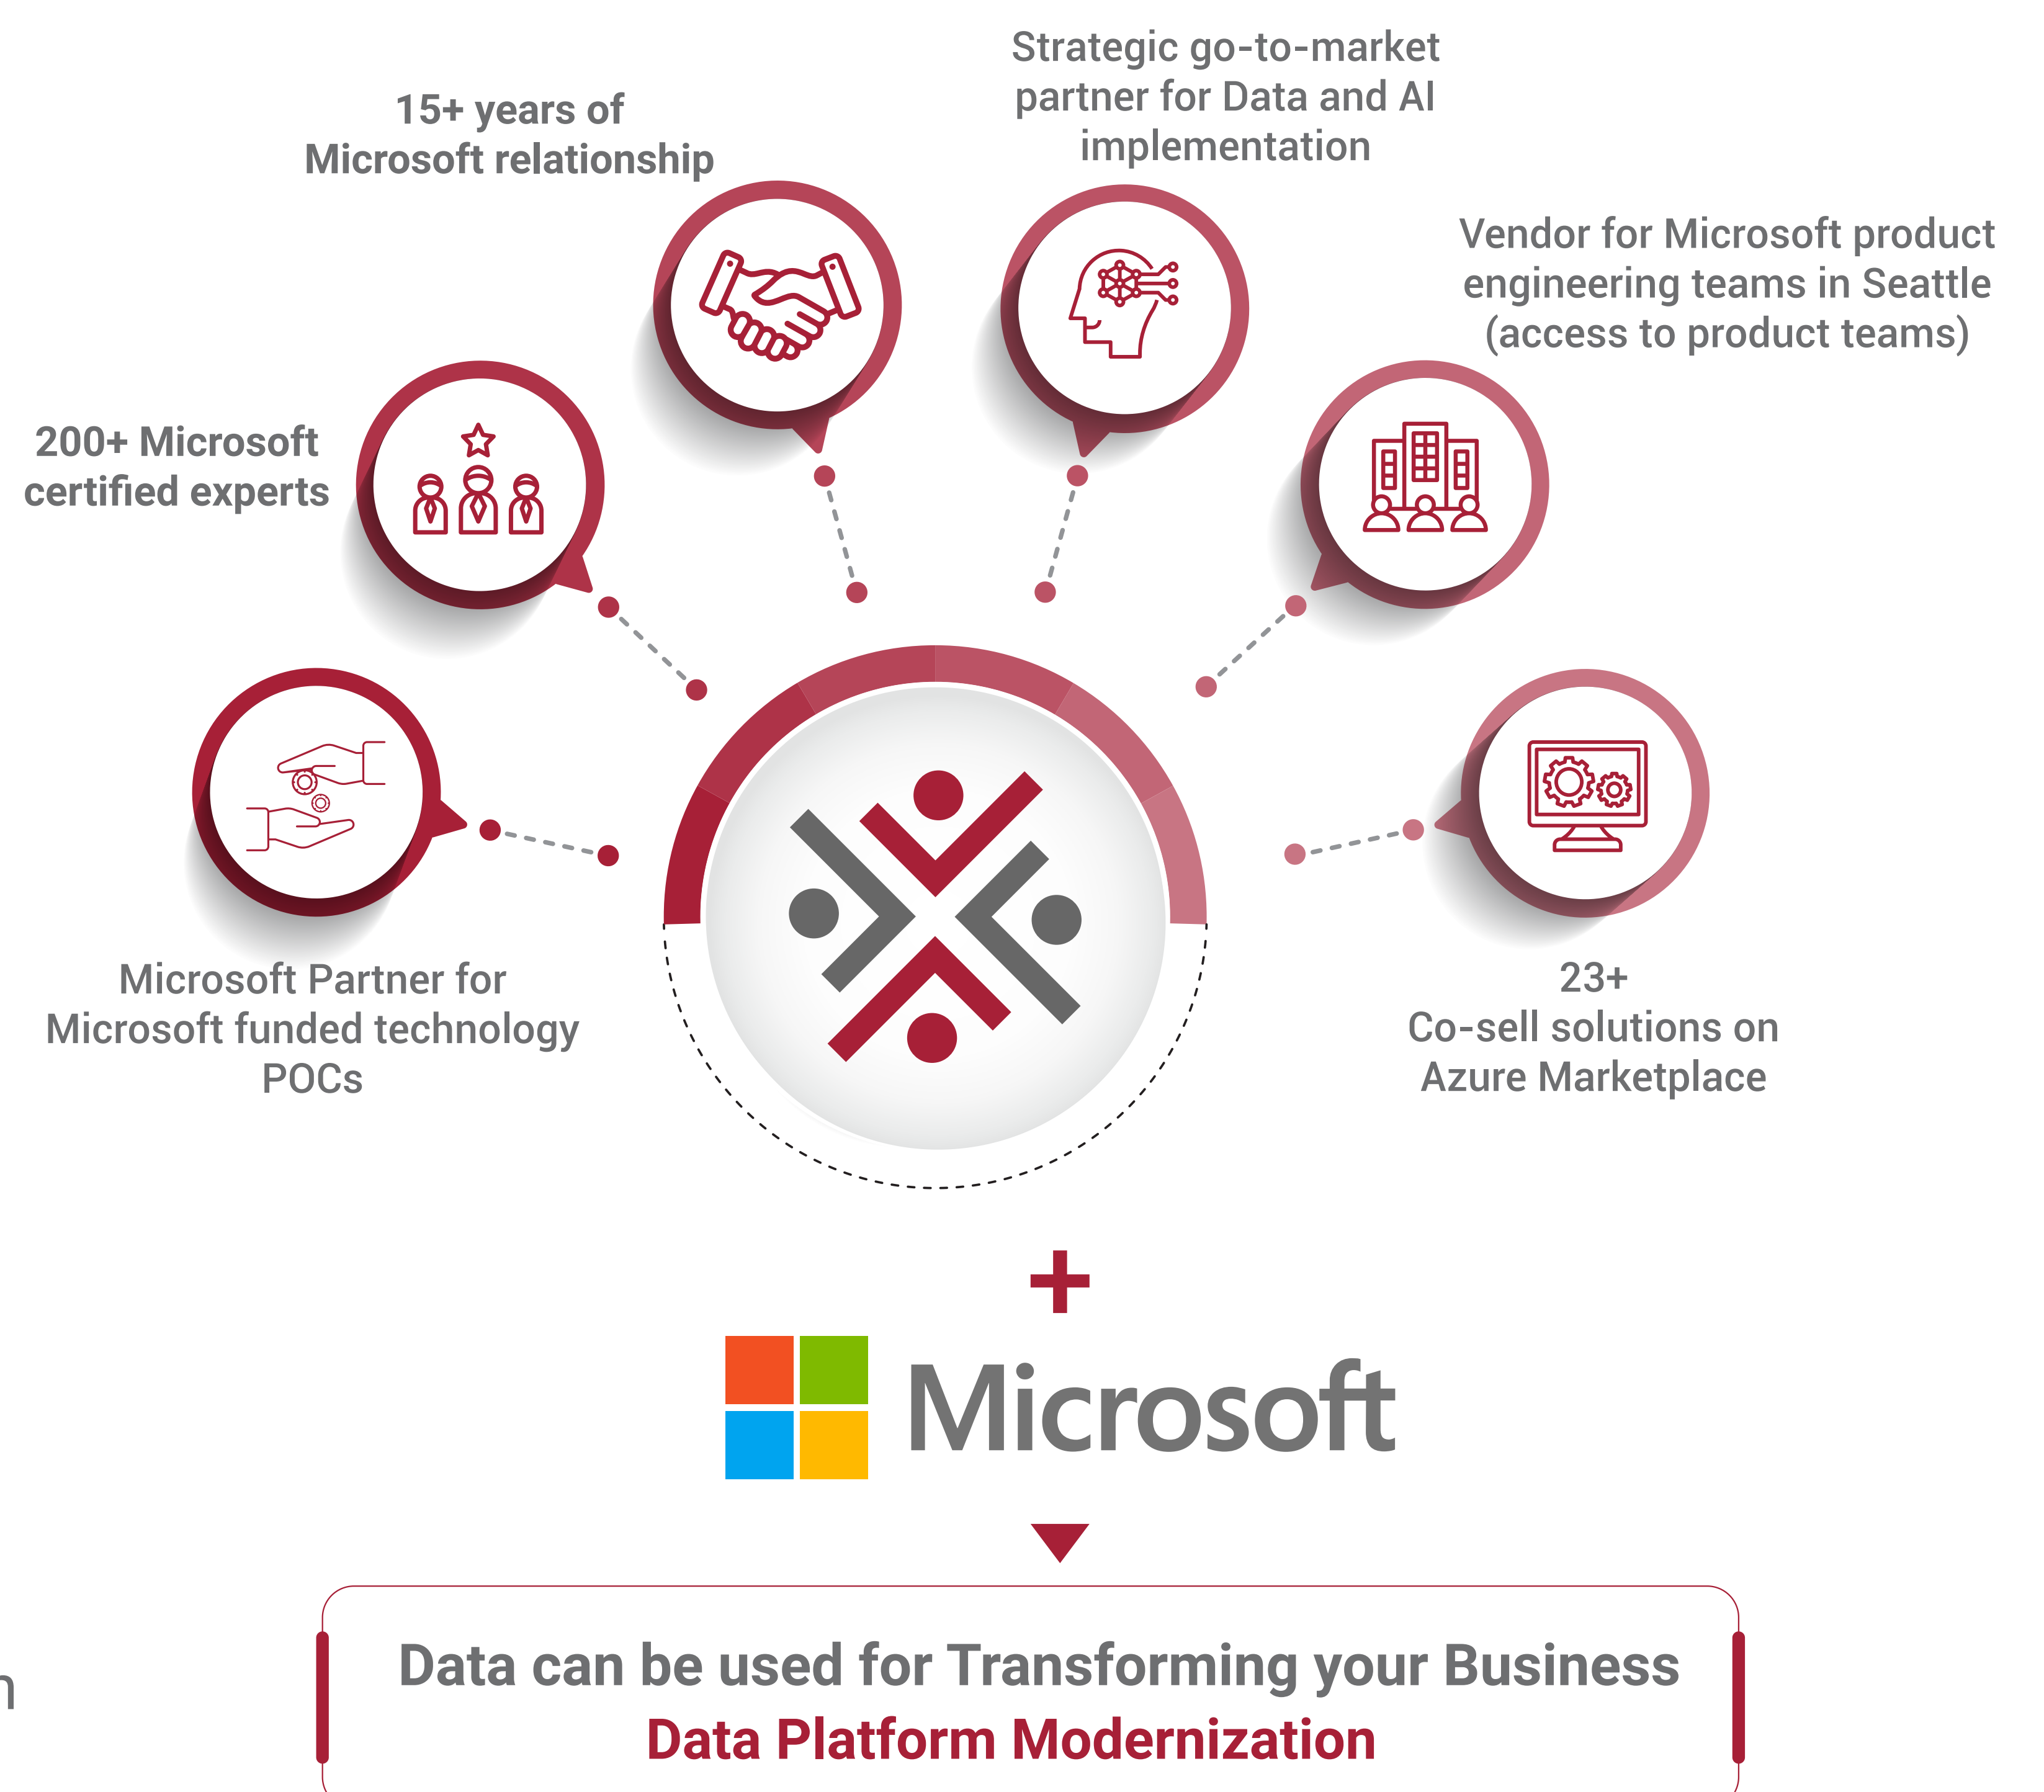

As **People Tech**, we have taken a big bet on **Azure Data Management** and **Azure Synapse** and are working with **Microsoft** leveraging funding options to implement solutions for our customers.

People Tech's Microsoft Azure Cloud service offerings are designed to meet unique and changing requirements.

People Tech Group: a **Microsoft Solution Partner**, is a leading global professional service company with over 2000 professionals and industry specialists. With our Team of Microsoft Certified Professionals, People Tech is committed to high business standards, and our partner

Synapse expertise & capabilities

- > **100+** trained Big Data Specialists
- > Early adopters and a **Microsoft** go-to partner for validating new technologies
- > **People Tech** works directly with the **Microsoft Synapse Product team**
- > One of few select partners allowed to work on and conceptualize **Azure Synapse** – Doing extensive product testing
- > **Microsoft** chose us because of our deep knowledge of **Big Data Analytics** space
- > Managed 1-2 Terabytes of **MS Production Data** for developing Synapse
- > Addressed significant product defects, and we have been instrumental in streamlining **Azure Synapse**.

Who can be benefited

Data Engineers
Data Architects
Business Analysts
Product/Program Managers
VP infrastructure support

Why migrate to Azure synapse analytics?

- > Deep integration with Azure Big Data ecosystem
- > Achieve industry-leading performance and optimize resource capability
- > Optimize your investment- use the compute you need when you need it
- > Bring data integration, data warehousing & big data analytics together
- > Quickly move the computing resources up and down as required
- > Secure data with the most advanced security and privacy features

Outcome Of the workshop

- > Get valuable insights from resources shared during the session
- > Accurate knowledge to choose the exemplary architecture for the platform
- > Best practices to create scalable, cost-optimized architecture using Synapse
- > Mapping of analytics use cases according to your business challenges
- > Detailed roadmap of the migration process, including pre- and post-migration scenarios
